## SUMMARY

Computer Science and Information Systems graduate experienced in full-stack development, IoT systems, hardware-software integration, and software testing across backend, web, mobile, and embedded environments. Focused on reliability, software quality, and problem solving.

## EXPERIENCE

### Full-Stack & IoT Developer Intern
**BlueBox Labs**
02/2026 - 06/2026 | Sfax, Tunisia

Contributed to the BlueBox smart irrigation platform across backend services, web and mobile applications, and embedded controllers.

- Developed Spring Boot REST APIs with PostgreSQL for devices, irrigation programs, logs, and real-time status updates.
- Built React dashboard features for monitoring, device configuration, reporting, and irrigation management.
- Developed Flutter features for onboarding, remote valve control, scheduling, and live monitoring.
- Integrated MQTT and REST/JSON exchanges between controllers, backend services, and applications; added Firebase Cloud Messaging alerts.
- Implemented ESP32-S3 firmware in C/C++ for valve control, state synchronization, sensor monitoring, and status reporting.
- Performed API, integration, and system testing; investigated functional issues and data exchange failures across platform components.

### Full-Stack Development Intern
**SECOME**
06/2025 - 08/2025 | Sfax, Tunisia

- Developed a React and Spring Boot web application, integrating a responsive frontend with a secure and efficient backend to improve user experience and system performance.

### Frontend Development Intern
**FUTURE PROOF**
08/2024 - 09/2024 | Sfax, Tunisia

- Developed and enhanced dynamic web interfaces using React.

### Computer Hardware Intern
**I TECH**
06/2024 - 07/2024 | Sfax, Tunisia

- Gained practical experience in computer hardware components, installation, configuration, and troubleshooting.

## EDUCATION

**Engineering Cycle in Computer Science - In Progress**
Institut International de Technologie - IIT | 2026 - Present | Evening classes

**Bachelor’s Degree in Computer Science and Information Systems**
Institut International de Technologie - IIT | 2023 - 2026

**Baccalaureate in Technical Sciences**
Lycée Ibn Rachik, Sfax | 2023

## SKILLS

**Software Testing & QA**

API testing, functional testing, integration testing, system testing, regression testing, debugging

**Programming Languages**

C, C++, Python, Java, JavaScript

**Embedded Systems & IoT**

ESP32-S3, Raspberry Pi, embedded systems, firmware development in C/C++, MQTT, Wi-Fi, embedded GUI, TFT displays, hardware-software integration

**Web & Mobile**

React, Flutter, HTML, CSS

**Backend & APIs**

Spring Boot, .NET, REST APIs, JSON, Firebase Cloud Messaging

**Databases**

PostgreSQL, MySQL, Oracle, SQL Server

**Version Control**

Git, GitHub, Bitbucket

**Tools & Containers**

Docker, PlatformIO, Android Studio

## LANGUAGES

Arabic: Native
English: B1
French: B1

## ORGANISATIONS

**IEEE RAS IIT SBc**
- Mentor | 01/2026 - Present
- Chair | 01/2025 - 12/2025
- Project Manager | 05/2024 - 12/2024

**Scouts, Scout Leader**
2019 - Present

## SOFT SKILLS

- Leadership and team motivation
- Decision-making and problem solving
- Stress management
- Clear and effective team communication

## PROJECTS

- **Smart Autonomous Vehicle** | 10/2025 - 11/2025 | Sfax, Tunisia
  Collaborated with a team in the Smart Autonomous Vehicle Challenge to develop a Raspberry Pi autonomous vehicle; contributed to sensor-based navigation and obstacle detection, strengthening embedded systems, hardware, and teamwork skills.
- **After-Sales Services Web Application** | 05/2025 - 06/2025 | Sfax, Tunisia
  Developed a .NET and SQL Server application with 2 separate interfaces for administrators and clients, secure data management, scalable clean architecture, and an intuitive user experience.
